Environmental Protection Agency  
State of Illinois

Dear Mr. Barry:

This letter is in response to the certification of closure submitted by David S. Retzlaff, Sundstrand Aerospace, for the hazardous waste pile at the above-referenced facility in Rockford, Illinois. This certification, signed by a representative of the owner/operator, David S. Retzlaff, and an independent registered professional engineer, Jeffery L. Pope, P.E., indicated that the subject hazardous waste management unit had been closed in accordance with the plan approved by the Agency on January 21, 1992.

The subject hazardous waste management unit was inspected by a representative of the Agency on April 8, 1996. The inspection revealed that the unit was closed in accordance with the approved closure plan. In addition, a review of the closure certification and accompanying closure documentation report also indicates that the unit was closed in accordance with the approved closure plan. Therefore, the Agency has determined that closure of the above-referenced unit at the above-referenced facility has apparently met the requirements of 35 IAC 725. Additionally, it appears as though the closure met the closure by removal or decontamination standards of 35 IAC 724.358, thus satisfying the requirements of 35 IAC 703.159 and 703.160. In accordance with 35 IAC 703.121(b), it will not be necessary for Sundstrand to pursue a post-closure permit for the subject waste pile.

As a result of completing closure of the subject hazardous waste management units the Agency has withdrawn your Part A application.

Additionally, this facility must continue to meet the requirements of 35 IAC 722, Standards Applicable to Generators of Hazardous Waste and 35 IAC 728, Land Disposal Restrictions.

Page 2

Finally, it must be noted that Sundstrand should adjust its financial assurance documents on file with the Agency (to meet the requirements of 35 Ill. Adm. Code 725, Subpart G) to reflect the closure of this unit.

Should you have any questions regarding this matter, please contact Michael A. Heaton at 217/524-3312.

Sincerely,

Edwin C. Bakowski, P.E.  
Manager, Permit Section
